SUBJECT INDEX

3-D
  knee joint, gait analysis
  inverse dynamics approach, joint reaction force, 392
3-D reconstruction
  stereoradiography, precision, accuracy, 163
absorbency
  incontinence, incontinence pads, clinical/technical correlation, standards, 212
accuracy
  stereoradiography, 3-D reconstruction, precision, 163
acetylcholine
  cholinergic neurotransmission, agonist/antagonist, synapse, 311
adaptive mesh refinement
  finite elements, composite restorations, interface stresses, 401
adaptive sampling
  ECG data compression, real-time processing, aztec, 510
agonist/antagonist
  cholinergic neurotransmission, acetylcholine, synapse, 311
airway compliance
  breathing mechanics, electrical analogues, respiratory resistance, respiratory impedance, 283
amplifier
  electromyography, EMG signal processing, frequency response, common mode rejection ratio, 413
anaerobic
  leg power, measurement, contact, flight, 430
aortic compliance
  aortic distensibility, blood pressure, Doppler ultrasound, 221
aortic distensibility
  aortic compliance, blood pressure, Doppler ultrasound, 221
arterial network
  computer simulation, optimization, 148
arthritis
  balancer, imbalance, knee, arthroplasty, 339
arthroplasty
  balancer, imbalance, knee, arthritis, 339
artificial neural networks
  magnetic resonance imaging, image segmentation, spin echo sequences, MR image synthesis, 355
asthma
  lung function, spirometry, measurement, 188
asymmetrical ventilation
  respiration, mathematical model, periodic breathing, 251
atherosclerosis
  mechanical tensometer, connective tissue, 27
attenuation
  blood flow, pulse wave propagation, transmission-line theory, reflection, 379
autotransfusion
  blood salvage, blood filtration, 143
aztec
  ECG data compression, real-time processing, adaptive sampling, 510
balancer
  imbalance, knee, arthroplasty, arthritis, 339
band-pass filter
  somatosensory evoked potential, single-trial recording, EEG waveform prediction, 257
bed
  normal force, shear force, seat, decubitus, 409
biocompatibility
  bioglass ceramic, chemical bonding, 481
bioglass ceramic
  chemical bonding, biocompatibility, 481
biomechanics
  gait analysis, kinematic measurement, high-speed video, pattern recognition, 140
  impact, facial injury, modelling, 67
  finite element method, bone, femur, strain gauge, 505
blood
  oximeters, soret band, pH, temperature, 171
blood filtration
  autotransfusion, blood salvage, 143
blood flow
  pulse wave propagation, transmission-line theory, attenuation, reflection, 379
  skin, laser Doppler flowmetry, shear forces, tissue modelling, 451
blood pressure
  non-invasive measurement, oscillometry, cuff, 279
  aortic compliance, aortic distensibility, Doppler ultrasound, 221
blood rheology
  diabetes, skin bloodflow, laser Doppler, 155
blood salvage
  autotransfusion, blood filtration, 143
body force concept
  ventricular contraction, pressure–volume relation, 167
body volume
  pre-term infant, densitometry, plethysmograph, 91
bolus by implants
  insulin implants, diabetes, sustained release, post-prandial hyperglycaemia control, 106
bone
  finite element method, femur, strain gauge, biomechanics, 505
  modelling, finite elements, stress convergence, strain energy, 474
bone landmarks
  kinematics, hand motion, stereoradiogram, 371
bone mechanics
  intervertebral joints, disc degeneration, computational mechanics, 235
bone remodelling
  hip prosthesis, densitometry, image analysis, 57
bone screws
  osteoporosis, plates, fracture fixation, 79
border tracking
  m-mode echocardiograms, echocardiography, edge detection, dynamic programming, 274
boundary entegral
  stress analysis, endosseous implants, equation method, finite, 319
breast compression
  mammography, tumour, malignant cells, 121
breathing mechanics
  electrical analogues, respiratory resistance, airway compliance, respiratory impedance, 283
calcaneal heel pad
  impact, shock absorption, viscoelastic materials, foot, 23
calcaneus
  force, muscle, ligament, 46
cardiac function
  multi-parametric function, optimization, 74
cardiac resonant oscillation
  linear second order differential equation, time constant, effective coltage and current, 349
cardiovascular flow
  fontan operations congenital heart surgery, 303
cementless total hip replacement
  computerized tomography, shape reconstruction, finite element analysis, 497
cervical motion analysis
  mobility, cervical spine, opto-electronic systems, 5
cervical spine
  mobility, cervical motion analysis, opto-electronic systems, 5
cervical spine coupled motion
  non-invasive measurement, IREDs, 13
chemical bonding
  bioglass ceramic, biocompatibility, 481
cholinergic neurotransmission
  agonist/antagonist, acetylcholine, synapse, 311
clinical/technical correlation
  incontinence, incontinence pads, absorbency, standards, 212
coded gesture recognition
  dynamic programming, rest-time signal processing, human-computer interaction rehabiitation technology, 181
common mode rejection ratio
  electromyography, emg signal processing, amplifier, frequency response, 413
compartment models
  pharmacokinetics, mean residence time (MRT), time delay, 240
composite restorations
  finite elements, interface stresses, adaptive mesh refinement, 401
compression bandage
  interface pressure, venous disease, pneumatic systems, 464
computational mechanics
  intervertebral joints, disc degeneration, bone mechanics, 235
computer analysis
  EMG, gait, footswitches, 487
computer simulation
  arterial network, optimization, 148
  therapeutic advisor, insulin dosage adjustment, *Diabetes mellitus*, 201
computerized screener
  deep venous thrombosis, venous occlusion plethysmograph, strain gauge plethysmography, 135
  computerized tomography
    shape reconstruction, finite element analysis, cementless total hip replacement, 497
conductance
  volume profiles, Salo's method, K-values, 267
congenital heart surgery
  fontan operations, cardiovascular flow, 303
connective tissue
  mechanical tensometer, atherosclerosis, 27
contact
  leg power, anaerobic, measurement, flight, 430
continuous blood pressure
  light transmittance, strain gauge, volume clamp plethysmography, finger, 151
coronary artery disease
  neural network, noninvasive acoustic detection, 469
creak
  forensic phonetics, voice disguise, speaker identification, power spectra, 193
cuff
  blood pressure, non-invasive measurement, oscillometry, 279
data analysis
  telemetry, transmitter, receiver, data collection, 435
data collection
  telemetry, transmitter, receiver, data analysis, 435
decubitus
  normal force, shear force, bed, seat, 409
decubitus ulcer
  interface pressure, measurement, repeatability, 329
deep venous thrombosis
  venour occlusion plethysmography, strain gauge plethysmography, computerized screener, 135
densitometry
  body volume, pre-term infant, plethysmograph, 91
  hip prosthesis, bone remodelling, image analysis, 57

diabetes
insulin implants, sustained release, post-prandial hyperglycaemia control, bolus by implants, 106
skin bloodflow, Laser Doppler, blood rheology, 155
Diabetes mellitus
therapeutic advisor, insulin dosage adjustment, computer simulation, 201
digital signal processing
ECG, wave digital matched filter, 132
disc degeneration
intervertebral joints, bone mechanics, computational mechanics, 235
disk model
volume measurements, water displacement volumetry, frustrum sign model, limits of agreement, 477
Doppler ultrasound
aortic compliance, aortic distensibility, blood pressure, 221
drive current
optical density, radiographic films, leds, 308
dynamic glucose variations
glucose sensors, lifespan, sterilization, 457
dynamic loading
human femoral cortical bone, Young's modulus, Poisson's ratio, strain rate, 60
dynamic programming
m-mode echocardiograms, echocardiography, edge detection, border tracking, 274
coded gesture recognition, real-time signal processing, human-computer interaction, rehabilitation technology, 181
ECG
digital signal processing, wave digital matched filter, 132
ECG data compression
real-time processing, adaptive sampling, aztec, 510
echocardiography
m-mode echocardiograms, edge detection, border tracking, dynamic programming, 274
edge detection
m-mode echocardiograms, echocardiography, border tracking, dynamic programming, 274
EEG waveform prediction
somatosensory evoked potential, single-trial recording, band-pass filter, 257
effective coltage and current
linear second order differential equation, cardiac resonant oscillation, time constant, 349
elastance measurement
vascular smooth muscle, pharmacology, 34
electrical analogues
breathing mechanics, respiratory resistance, airway compliance, respiratory impedance, 283
electromyography
EMG signal processing, amplifier, frequency response, common mode rejection ratio, 413
EMG
surgical floor mat, standing, 247
gait, computer analysis, footswitches, 487
EMG signal processing
electromyography, amplifier, frequency response, common mode rejection ratio, 413
endosseous implants
stress analysis, boundary entegral, equation method, finite, 319
equation method
stress analysis, endosseous implants, boundary entegral, finite, 319
facial injury
biomechanics, impact, modelling, 67
femur
finite element method, bone, strain gauge, biomechanics, 505
FES
gait, flexion withdrawal response, habituation, 51
fetal monitoring
meconium, meconium aspitation syndrome, optical sensor, obstetrics, 229
fibre type
muscle fatigue, paraplegics, quadriceps, tourniquet, 443
finger
light transmittance, strain gauge, continuous blood pressure, volume clamp plethysmography, 151
finite
stress analysis, endosseous implants, boundary entegral, equation method, 319
finite element analysis
computerized tomography, shape reconstruction, cementless total hip replacement, 497
finite element method
meniscofemoral joint, stress analysis, 324
bone, femur, straing gauge, biomechanics, 505
finite elements
composite restorations, interface stresses, adaptive mesh refinement, 401
modelling, stress convergence, strain energy, bone, 474
flexion withdrawal response
FES, gait, habituation, 51
flight
leg power, anaerobic, measurement, contact, 430
fontan operations
congenital heart surgery, cardiovascular flow, 303
foot
impact, calcaneal heel pad, shock absorption, viscoelastic materials, 23
footswitches
EMG, gait, computer analysis, 487
force
calcaneus, muscle, ligament, 46
forensic phonetics
creak, voice disguise, speaker identification, power spectra, 193
fracture fixation
osteoporosis, bone screws, plates, 79
frequency response
electromyography, EMG signal processing, amplifier, common mode rejection ratio, 413
frustrum signal model
volume measurements, water displacement volumetry, disk model, limits of agreement, 477
functional electrical stimulation
paraplegia, gait, 159
functional electrical stimulation (FES)
paralysed muscles, stimulator, transcutaneous stimulation, 333
gait
FES, flexion withdrawal response, habituation, 51
EMG, computer analysis, footswitches, 487
functional electrical stimulation, paraplegia, 159
gait analysis
biomechanics, kinematic measurement, high-speed video, pattern recognition, 140
knee joint, 3-D, inverse dynamics approach, joint reaction force, 392
gas mixing
model lung, lung volume, venturi device, 420
glucose sensors
lifespan, sterilization, dynamic glucose variations, 457
habituation
FES, gait, flexion withdrawal response, 51
hand
stereoradiogrammetry, joint alignment measurement, 99
hand motion
kinematics, bone landmarks, stereoradiogram, 371
high-speed video
gait analysis, biomechanics, kinematic measurement, pattern recognition, 140
hip prosthesis
densitometry, bone remodelling, image analysis, 57
human
neurological tests, movement disorders, manual movements, method of quantification, 363
human femoral cortical bone
dynamic loading, Young's modulus, Poisson's ratio, strain rate, 60
human-computer interaction
dynamic programming, coded gesture recognition, real-time signal processing, rehabilitation technology, 181
hysteresis
lumbrodorsal fascia, viscoelasticity, stress relaxation, 425
image analysis
hip prosthesis, densitometry, bone remodelling, 57
image segmentation
magnetic resonance imaging, artificial neural networks, spin echo sequences, MR image synthesis, 355
imbalance
balancer, knee, arthroplasty, arthritis, 339
impact
calcaneal heel pad, shock absorption, viscoelastic materials, foot, 23
bioechanics, facial injury, modelling, 67
incontinence
incontinence pads, absorbency, clinical/technical correlation, standards, 212
incontinence pads
incontinence, absorbency, clinical/technical correlation, standards, 212
insulin dosage adjustment
therapeutic advisor, *Diabetes mellitus*, computer simulation, 201
insulin implants
diabetes, sustained release, post-prandial hyperglycaemia control, bolus by implants, 106
interface pressure
transducers, measurement errors, 344
compression bandage, venous disease, pneumatic systems, 464
decubitus ulcer, measurement, repeatability, 329
interface stresses
finite elements, composite restorations, adaptive mesh refinement, 401
intervertebral joints
disc degeneration, bone mechanics, computational mechanics, 235
inverse dynamics approach
knee joint, gait analysis, 3-D, joint reaction force, 392
IREDs
cervical spine coupled motion, non-invasive measurement, 13
joint alignment measurement
stereoradiogrammetry, hand, 99
joint reaction force
knee joint, gait analysis, 3-D, inverse dynamics approach, 392
K-values
volume profiles, conductance, Salo's method, 267
lung volume
model lung, venturi device, gas mixing, 420
m-mode echocardiograms
echocardiography, edge detection, border tracking, dynamic programming, 274
magnetic resonance imaging
image segmentation, artificial neural networks, spin echo sequences, MR image synthesis, 355
malignant cells
breast compression, mammography, tumour, 121
mammography
breast compression, tumour, malignant cells, 121

manual movements
human, neurological tests, movement disorders, method of quantification, 363
mathematical model
respiration, asymmetrical ventilation, periodic breathing, 251
mathematical modelling
patello-femoral joint, patellar tracking, patello-femoral contact, 289
mean residence time (MRI)
pharmacokinetics, compartment models, time delay, 240
measurement
leg power, anaerobic, contact, flight, 430
decubitus ulcer, interface pressure, repeatability, 329
asthma, lung function, spirometry, 188
measurement errors
transducers, interface pressure, 344
mechanical tensometer
connective tissue, atherosclerosis, 27
meconium
meconium aspitation syndrome, optical sensor, fetal monitoring, obstetrics, 229
meconium aspitation syndrome
meconium, optical sensor, fetal monitoring, obstetrics, 229
meniscofemoral joint
finite element method, stress analysis, 324
method of quantification
human, neurological tests, movement disorders, manual movements, 363
mobility
cervical spine, cervical motion analysis, opto-electrotocic systems, 5
model lung
lung volume, venturi device, gas mixing, 420
modelling
biomechanics, impact, facial injury, 67
finite elements, stress convergence, strain energy, bone, 474
non-invasive measurement
cervical spine coupled motion, IREDs, 13
motor units
selecxtive stimulation, peripheral nerve, nerve fibres, multielectrode nerve stimulation, 113
movement disorders
human, neurological tests, manual movements, ethod of quanitification, 363
MR image synthesis
magnetic resonance imaging, image segmentation, artificial neural networks, spin echo sequences, 355
multi-parametric function
cardiac function, optimization, 74
multielectrode nerve stimulation
selective stimulation, peripheral nerve, nerve fibres, motor units, 113
muscle
calcaneus, force, ligament, 46
muscle fatigue
paraplegics, quadriceps, fibre type, tourniquet, 443
nerve fibres
selective stimulation, peripheral nerve, multielectrode nerve stimulation, motor units, 113
neural network
coronary artery disease, noninvasive acoustic detection, 469
neurological tests
human, movement disorders, manual movements, method of quantification, 363
non-invasive measurement
blood pressure, oscillometry, cuff, 279
noninvasive acoustic detection
neural network, coronary artery disease, 469
normal force
shear force, bed, seat, decubitus, 409
obstetrics
meconium, meconium aspitation syndrome, optical sensor, fetal monitoring, 229
optical density
radiographic films, leds, drive current, 308
optical sensor
meconium, meconium aspitation syndrome, fetal monitoring, obstetrics, 229
optimization
cardiac function, multi-parametric function, 74
arterial network, computer simultion, 148
opto-electrtocic systems
mobility, cervical spine, cervical motion analysis, 5
oscillometry
blood pressure, non-invasive measurement, cuff, 279
osteoporosis
bone screws, plates, fracture fixation, 79
oximeters
soret band, blood, pH, temperature, 171
pH
oximeters, soret band, blood, temperature, 171
paralysed muscles
functional electrical stimulation (FES), stimulator, transcutaneous stimulation, 333
paraplegia
functional electrical stimulation, gait, 159
paraplegics
muscle fatigue, quadriceps, fibre type, tourniquet, 443
patellar tracking
patello-femoral joint, mathematical modelling, patello-femoral contact, 289
patello-femoral contact
patello-femoral joint, mathematical modelling, patellar tracking, 289
patello-femoral joint
mathematical modelling, patellar tracking, patello-femoral contact, 289
pattern recognition
gait analysis, biomechanics, kinematic measurement, high-speed video, 140
periodic breathing
respiration, mathematical model, asymmetrical ventilation, 251
peripheral nerve
selective stimulation, nerve fibres, multi-electrode nerve stimulation, motor units, 113
pharmacokinetics
compartment models, mean residence time (MRT), time delay, 240
pharmacology
elastance measurement, vascular smooth muscle, 34
plates
osteoporosis, bone screws, fracture fixation, 79
plethysmograph
body volume, pre-term infant, densitometry, 91
pneumatic systems
compression bandage, interface pressure, venous disease, 464
Poisson's ratio
human femoral cortical bone, dynamic loading, Young's module, strain rate, 60
post-prandial hyperglycaemia control
insulin implants,diabetes, sustained release, bolus by implants, 106
power spectra
forensic phonetics, creak, voice disguise, speaker identification, 193
pre-term infant
body volume, densitometry, plethysmograph, 91
precision
stereoradiography, 3-D reconstruction, accuracy, 163
pressure-volume relation
ventricular contraction, body force concept, 167
pulse wave propagation
blood flow, transmission-line theory, attenuation, reflection, e79
quadriceps
muscle fatigue, paraplegics, fibre type, tourniquet, 443
radiographic films
optical density, leds, drive current, 308
real-time processing
ECG data compression, adaptive sampling, aztec, 510
real-time signal processing
dynamic programming, coded gesture recognition, human-computer interaction rehabilitation technology, 181
receiver
telemetry, transmitter, data collection data analysis, 435
reflection
blood flow, pulse wave propagation, transmission-line theory, attenuation, 379
rehabilitation technology
dynamic programming, coded gesture recognition, real-time signal processing, human-computer interaction, 181
repeatability
decubitus ulcer, interface pressure, measurement, 329
respiration
mathematical model, asymmetrical ventilation, periodic breathing, 251
respiratory impedance
breathing mechanics, electrical analogues, respiratory resistance, airway compliance, 283
respiratory resistance
breathing mechanics, electrical analogues, airway compliance, respiratory impedance, 283
right ventricle
right ventricular geometry, right ventricular wall mass, right ventricular free wall, 127
right ventricular geometry, right ventricular volume, 387
right ventricular free wall
right ventricular geometry, right ventricular wall mass, right ventricle, 127
right ventricular geometry
right ventricuar wall mass, right ventricle, right ventricular free wall, 127
right ventricular volume, right ventricle, 387
right ventricular volume
right ventricular geometry, right ventricle, 387
right ventricular wall mass
right ventricular geometry, right ventricle, right ventricular free wall, 127
Salo's method
volume profiles, conductance, K-values, 267
seat
normal force, shear force, bed, decubitus, 409
selective stimulation
peripheral nerve, nerve fibres, multielectrode nerve stimulation, motor units, 113
shape reconstruction
computerized tomography, finite element analysis, cementless total hip replacement, 497
shear force
normal force, bed, seat, decubitus, 409
shear forces
skin, blood flow, laser Doppler flowmetry, tissue modelling, 451
shock absorption
impact, calcaneal heel pad, viscoelastic materials, foot, 23
single-trial recording
somatosensory evoked potential, band-pass filter, EEG waveform prediction, 257
skin
blood flow, laser Doppler flowmetry, shear forces, tissue odelling, 451
skin bloodflow
diabetes, Laser Doppler, blood rheology, 155
somatosensory evoked potential
single-trial recording, band-pass filter, ECG waveform prediction, 257
soret band
oximeters, blood, pH, temperature, 171
speaker identification
forensic phonetics, creak, voice disguise, power spectra, 193

spin echo sequences
magnetic resonance imaging, image segmentation, artificial neural networks, MR image synthesis, 355
spirometry
asthma, lung function, measurement, 188
standards
incontinence, incontinence pads, absorbency, clinical/technical correlation, 212
qstanding
surgical floor mat, EMG, 247
stereoradiogram
kinematics, hand motion, bone landmarks, 371
stereoradiogrammetry
joint alignment measurement, hand, 99
stereoradiography
3-D reconstruction, precision, accuracy, 163
sterilization
glucose sensors, lifespan, dynamic glucose variations, 457
stimulator
functional electrical stimulation (FES), paralysed muscles, transcutaneous stimulation, 333
strain energy
modelling, finite elements, stress convergence, bone, 474
strain gauge
light transmittance, continuous blood pressure, volume clamp plethysmography, finger, 151
finite element method, bone, femur, biomechanics, 505
strain gauge plethysmography
deep venous thrombosis, venour occlusion plethysmography, computerized screener, 135
strain rate
human femoral cortical bone, dynamic loading, Young's modulus, Poisson's ratio, 60
stress analysis
endosseous implants, boundary entegral, equation method, finite, 319
finite element method, meniscofemoral joint, 324
stress convergence
modelling, finite elements, strain energy, bone, 474
stress relaxation
lumbrodorsal fascia, viscoelasticity, hysteresis, 425
surgical floor mat
standing EMG, 247
sustained release
insulin implants, diabetes, post-prandial hyperglycaemia control, bolus by implants, 106
synapse
cholinergic neurotransmission, agonist/antagonist, acetylcholine, 311
telemetry
transmitter, receiver, data collection, data analysis, 435
temperature
oximeters, soret band, blood, pH, 171
therapeutic advisor
insulin dosage adjustment, *Diabetes mellitus*, computer simulation, 201
time constant
linear second order differential equation, cardiac resonant oscillation, effective coltage and current, 349
time delay
pharmacokinetics, compartment models, mean residence time (MRT), 240
tissue modelling
skin, blood flow, laser Doppler flowmetry, shear forces, 451
tourniquet
muscle fatigue, paraplegics, quadriceps, fibre type, 443
transcutaneous stimulation
functional electrical stimulation (FES), paralysed muscles, stimulator, 333
transducers
interface pressure, measurement errors, 344
transmission-line theory
Blood flow, pulse wave propagation attenuation, reflection, 379
transmitter
telemetry, receiver, data collection, data analysis, 435
tumour
breast compression, mammography, malignant cells, 121
vascular smooth muscle
elastance measurement, pharmacology, 34
venous occlusion plethysmography
deep venous thrombosis, strain gauge plethysmography, computerized screener, 135
venous disease
compression bandage, interface pressure, pneumatic systems, 464
ventricular contraction
pressure-volume relation, body force concept, 167
venturi device
model lung, lung volume, gas mixing, 420
viscoelastic materials
impact, calcaneal heel pad, shock absorption, foot, 23
viscoelasticity
lumbrodorsal fascia, hysteresis, stress relaxation, 425
voice disguise
forensic phonetics, creak, speaker identification, power spectra, 193
volume clamp plethysmography
light transmittance, strain gauge, continuous blood pressure, finger, 151
volume measurements
water displacement volumetry, disk model, frustrum sign model, limits of agreement, 477
volume profiles
conductance, Salo's method, K-values, 267
water displacement volumetry
volume measurements, disk model, frustrum sign model, limits of agreement, 477
wave digital matched filter
digital signal processing, ECG, 132
Young's modulus
human femoral cortical bone, dynamic loading, Poisson's ratio, strain rate, 60
